OCI (Overseas Citizen of India) — eligible to live and work in India

Summary

AWS Certified Backend Engineer with almost 5 years of experience building scalable backend services, microservices, and API-driven platforms. Experienced in Java, Spring Boot, Node.js, NestJS, PostgreSQL, AWS, Docker, and Kubernetes. Strong in backend architecture, API design, database optimization, distributed systems, and secure application development, with experience supporting 10,000+ concurrent users.

Skills

Languages: Java, JavaScript, TypeScript, C++, SQL, PowerShell

Backend & APIs: Java, Spring Boot, Node.js, NestJS, Express.js, REST APIs, API Design, JWT, Microsoft Graph API

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, TypeORM, Schema Design, Indexing, Query Optimization

Cloud & DevOps: AWS, Amazon S3, Docker, Kubernetes, Nginx, Azure DevOps, CI/CD, Linux

Architecture & Distributed Systems: System Design, Microservices, Distributed Systems, Event-Driven Architecture, Service-Oriented Architecture, Kafka, RabbitMQ

Security: Spring Security, JWT, RBAC, Authentication, Authorization, Rate Limiting, IP Throttling, Audit Logging

Tools: Git, Swagger/OpenAPI, Postman, PowerShell, PnP PowerShell

Work Experience

Infra Managed Service Analyst — Backend & Automation

Mar 2024 – Present

Accenture — Bengaluru, India

- Engineered API-driven administrative workflows using PowerShell 7 and Microsoft Graph API to streamline bulk provisioning, governance, reporting, and operational processes across enterprise Microsoft 365 environments.
- Automated server management and tenant-wide governance operations using PowerShell and PnP PowerShell, reducing manual operational effort by **75%**.
- Delivered L2/L3 production support, performing root cause analysis, troubleshooting complex cross-platform incidents, and maintaining ITIL-based SLA compliance.
- Led multi-terabyte Microsoft 365 migrations using structured planning and change-management processes while maintaining data integrity and **zero data loss**.
- Maintained SLA compliance across change, incident, and problem management using ServiceNow, aligned with ITIL practices and internal audit requirements.
- Authored and maintained SOPs and configuration baselines across SharePoint, Microsoft Teams, OneDrive, and Power Platform, streamlining onboarding and audit readiness.

Backend Engineer — Freelance

Nov 2025 – Mar 2026

CA Sanjeev Gupta & Co. — Bengaluru, India

- Architected and deployed a secure, scalable B2B client management platform using Node.js, NestJS, and TypeScript, digitizing internal workflows and enterprise client interactions.
- Designed a hybrid service-oriented architecture with JWT authentication, RBAC, rate limiting, IP throttling, and audit logging, reducing system coupling by **60%**.
- Built a custom headless CMS with Type-2 audit versioning and automated SEO metadata generation, improving content operations efficiency by **90%**.
- Optimized backend performance using PostgreSQL query optimization, TypeORM indexing, caching, and database tuning, achieving **sub-100ms** API response times.
- Automated production deployments using Docker multi-stage builds and Nginx, reducing deployment time **from 20 minutes to 3 minutes**.
- Used Claude Code to accelerate backend development, debugging, refactoring, and code analysis while validating generated changes through testing and engineering review.

Application Development Associate

Dec 2021 – Feb 2024

Accenture — Bengaluru, India

- Developed and deployed a highly available microservices platform using Java and Spring Boot for client feedback and document uploads, supporting **10,000+ concurrent users** through Kubernetes-based deployment and scaling.
- Designed and optimized REST APIs with Spring Boot on PostgreSQL, improving response times by **75–80%** through query optimization, indexing, and Redis caching.
- Built CI/CD pipelines in Azure DevOps with Docker, automating build, test, and deployment to Kubernetes, improving release consistency and minimizing downtime.
- Implemented document upload handling using Amazon S3 for object storage, ensuring reliable file handling under concurrent load.
- Implemented asynchronous event-driven processing using Kafka/RabbitMQ to decouple document processing from the request path, improving system resilience.
- Secured APIs with Spring Security and JWT-based authentication, implementing role-based access control on endpoints.
- Participated in code reviews and mentored junior developers, contributing to engineering quality and knowledge sharing.

Education

Bachelor of Technology in Computer Science and Engineering

2017 – 2021

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology

Chennai, India

CGPA: 8.23/10.0

Certifications & Achievements

AWS Certified Solutions Architect – Associate, Amazon Web Services.

Recognized by stakeholders for outstanding project delivery; ranked 3rd as a team in an inter-department coding competition.

Co-founder, WUS Bhoomika Eco Logistics Pvt Ltd (2026–Present) — B2B waste-logistics venture; pre-launch.
