SUMMARY

AWS Certified Backend Engineer with almost 5 years of experience building and operating backend services, microservices, and API-driven platforms end-to-end. Experienced in Java, Spring Boot, Node.js, NestJS, PostgreSQL, AWS, Docker, and Kubernetes. Strong in distributed systems, API design, database optimization, secure backend development, CI/CD, and production troubleshooting, with experience supporting 10,000+ concurrent users.

SKILLS

Backend & APIs: Java, Spring Boot, Node.js, NestJS, Express.js, REST APIs, API Design, JWT, Microsoft Graph API

Architecture & Distributed Systems: Microservices, Distributed Systems, System Design, Event-Driven Architecture, Kafka, RabbitMQ, Service-Oriented Architecture

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, TypeORM, Schema Design, Indexing, Query Optimization

Cloud & DevOps: AWS, Amazon S3, Docker, Kubernetes, Nginx, Azure DevOps, CI/CD, Linux

Security: Spring Security, JWT, RBAC, Authentication, Authorization, Rate Limiting, IP Throttling, Audit Logging

Languages: Java, JavaScript, TypeScript, C++, SQL, PowerShell

AI-Assisted Development: Claude Code, AI-assisted coding, debugging, refactoring, code analysis

Tools: Git, Swagger/OpenAPI, Postman, PowerShell, PnP PowerShell

WORK EXPERIENCE

Infra Managed Service Analyst — Backend & Automation

Mar 2024 – Present

Accenture — Bengaluru, India

- Engineered API-driven administrative workflows using PowerShell 7 and Microsoft Graph API to streamline bulk provisioning, governance, and reporting across enterprise Microsoft 365 environments.
- Automated server management and tenant-wide governance operations using PowerShell and PnP PowerShell, reducing manual operational effort by **75%**.
- Delivered L2/L3 production support, performing root cause analysis and troubleshooting complex cross-platform incidents while maintaining production service reliability.
- Owned enterprise Microsoft 365 platform operations across SharePoint, Microsoft Teams, OneDrive, and Power Platform.

Backend Engineer — Freelance

Nov 2025 – Mar 2026

CA Sanjeev Gupta & Co. — Bengaluru, India

- Independently architected and deployed a secure, scalable B2B client management platform using Node.js, NestJS, and TypeScript, digitizing internal workflows and enterprise client interactions end-to-end.
- Designed a hybrid service-oriented architecture separating authentication from core business services, reducing system coupling by **60%**.
- Implemented secure authentication and authorization using JWT, RBAC, rate limiting, IP throttling, encryption, and audit logging.
- Built a custom headless CMS with Type-2 audit versioning and automated SEO metadata generation, improving content operations efficiency by **90%**.
- Optimized backend performance using PostgreSQL query optimization, TypeORM indexing, caching, and database tuning, achieving **sub-100ms** API response times.
- Automated production deployments using Docker multi-stage builds and Nginx, reducing deployment time **from 20 minutes to 3 minutes**.
- Used Claude Code to accelerate backend development, debugging, refactoring, and code analysis, validating AI-assisted changes through testing and engineering review.

- Developed and deployed a highly available microservices platform using Java and Spring Boot for client feedback and document uploads, supporting **10,000+ concurrent users** through Kubernetes-based deployment and scaling.
- Designed and optimized REST APIs with Spring Boot on PostgreSQL, improving response times by **75–80%** through query optimization, indexing, and Redis caching.
- Built CI/CD pipelines in Azure DevOps with Docker, automating build, test, and deployment to Kubernetes, improving release consistency and minimizing downtime.
- Implemented document upload handling using Amazon S3 for object storage, ensuring reliable file handling under concurrent load.
- Implemented asynchronous event-driven processing using Kafka/RabbitMQ to decouple document processing from the request path, improving system resilience.
- Secured APIs with Spring Security and JWT-based authentication, implementing role-based access control on endpoints.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

2017 – 2021

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology

Chennai, India

CGPA: 8.23/10.0

CERTIFICATIONS

AWS Certified Solutions Architect – Associate — Amazon Web Services

ACHIEVEMENTS

Recognized by stakeholders for outstanding performance in meeting critical project deadlines. Ranked 3rd as a team in an inter-department coding competition.

ADDITIONAL INFORMATION

Co-founder, WUS Bhoomika Eco Logistics Pvt Ltd (2026–Present) — B2B waste-logistics venture; pre-launch.
