Thai Citizen — Full right to work in Thailand — No visa sponsorship required — Relocating to Bangkok

Summary

AWS Certified Backend Engineer with almost 5 years of experience building backend services, microservices, and API-driven platforms. Experienced in Java, Spring Boot, Node.js, NestJS, PostgreSQL, AWS, Docker, and Kubernetes. Strong in API design, distributed systems, database optimization, security, and production troubleshooting, with experience supporting 10,000+ concurrent users.

Languages

English: Professional/Advanced Fluency **Thai:** Conversational **Hindi:** Native

Skills

Backend & APIs: Java, Spring Boot, Node.js, NestJS, Express.js, TypeScript, REST APIs, API Design, Microservices, Service-Oriented Architecture, Event-Driven Architecture

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, TypeORM, Schema Design, Indexing, Query Optimization

Messaging & Distributed Systems: Kafka, RabbitMQ, Event-Driven Architecture, Distributed Systems, Asynchronous Processing

Cloud & DevOps: AWS, Amazon S3, Docker, Kubernetes, Nginx, Azure DevOps, CI/CD, Linux

Architecture & Security: System Design, Microservices, JWT, RBAC, Authentication, Authorization, Rate Limiting, IP Throttling, Audit Logging, Secure API Design

Languages: JavaScript, TypeScript, Java, SQL, C++, PowerShell

AI-Assisted Development: Claude Code, AI-assisted coding, debugging, refactoring, code analysis, testing and validation

Tools: Git, Swagger/OpenAPI, Postman, PowerShell, PnP PowerShell

Work Experience

Infra Managed Service Analyst — Backend & Automation

Mar 2024 – Present

Accenture — Bengaluru, India

- Engineered API-driven administrative workflows using **PowerShell 7** and **Microsoft Graph API** to streamline bulk provisioning, governance, and reporting across enterprise Microsoft 365 environments.
- Automated server management and tenant-wide governance operations using **PowerShell** and **PnP PowerShell**, reducing manual operational effort by **75%**.
- Delivered **L2/L3 production support**, performing root cause analysis and troubleshooting complex cross-platform incidents while maintaining ITIL-based SLA compliance.
- Owned enterprise Microsoft 365 platform operations across **SharePoint**, **Microsoft Teams**, **OneDrive**, and **Power Platform**, supporting production-critical enterprise environments.

Backend Engineer — Freelance

Nov 2025 – Mar 2026

CA Sanjeev Gupta & Co. — Bengaluru, India

- Architected and deployed a secure, scalable B2B client management platform using **Node.js**, **NestJS**, and **TypeScript**, digitizing internal workflows and enterprise client interactions.
- Designed a service-oriented architecture separating authentication from core business services, reducing system coupling by **60%**.
- Implemented secure authentication and authorization using **JWT**, **RBAC**, **permission controls**, **rate limiting**, **IP throttling**, **encryption**, and **audit logging**.
- Built a custom headless CMS with Type-2 audit versioning and automated SEO metadata generation, improving content operations efficiency by **90%**.
- Optimized backend performance using **PostgreSQL query optimization**, **TypeORM indexing**, **caching**, and **database tuning**, achieving **sub-100ms API response times**.

- Automated production deployments using **Docker multi-stage builds and Nginx**, reducing deployment time **from 20 minutes to 3 minutes**.
- Used **Claude Code** as an AI development co-pilot for implementation, debugging, refactoring, and code analysis, validating generated code through testing and manual review.

Application Development Associate

Dec 2021 – Feb 2024

Accenture — Bengaluru, India

- Developed and deployed a highly available microservices platform using **Java and Spring Boot**, supporting **10,000+ concurrent users** through Kubernetes-based deployment and scaling.
- Designed and optimized REST APIs with **Spring Boot and PostgreSQL**, improving response times by **75–80%** through query optimization, indexing, and Redis caching.
- Built CI/CD pipelines using **Azure DevOps and Docker**, automating build, testing, and Kubernetes deployment while improving release consistency and minimizing downtime.
- Implemented document upload handling using **Amazon S3** for object storage, ensuring reliable file handling under concurrent load.
- Implemented asynchronous event-driven processing using **Kafka/RabbitMQ**, decoupling document processing from the request path and improving system resilience and scalability.
- Secured APIs using **Spring Security and JWT-based authentication**, implementing role-based access control across application endpoints.

Education

Bachelor of Technology in Computer Science and Engineering

2017 – 2021

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and TechnologyChennai, India

CGPA: 8.23/10.0

Certifications

AWS Certified Solutions Architect – Associate Amazon Web Services

Achievements

- Recognized by stakeholders for outstanding performance in meeting critical project deadlines.
- Ranked 3rd as a team in an inter-department coding competition.

Additional Information

Relocation: Planning to relocate to Bangkok, Thailand.
Work Authorization: Thai citizen with full right to work in Thailand; no visa sponsorship required.
